THE PARTNERSHIP

BET partnered with VideoAmp

to explore advanced metrics that are as multi-dimensional as the reality of the BET Awards viewing audience.

The goal was to provide additional and unparalleled value to advertisers with a focus on tentpole events.

THE INSIGHTS

In addition to standard audience metrics, the partnership was designed to evaluate the effectiveness of the BET Awards in reaching High-Value audiences across BET.

- **Identification and measurement of advanced audience segments, specific to the target viewers for both network and advertiser.**
- **Leveraging second-by-second data to understand key moments during the event.**

THE IMPACT

Advanced Audience AA viewing for the 2022 BET Awards was more than 2½ times higher than BET's Prime average audience

...underscoring the strong engagement BET has with its most valued viewers
